SUMMARY

Results-driven Business Analyst and B.Com graduate with hands-on experience in business reporting, data modeling, and operational strategy. Highly proficient in utilizing SQL (PostgreSQL), Power BI, and Advanced Excel (Power Pivot) to build relational databases, structure raw data, and extract actionable commercial insights. Proven track record of automating digital marketing operations, streamlining commercial workflows, and supporting data-driven corporate decision-making.

PROFESSIONAL EXPERIENCE

- Business Operations & Digital Strategy Lead, Banarasi Zaika | Varanasi**04/2023 – 05/2026
Varanasi
- Automated digital marketing workflows to streamline the production of targeted video advertisements, driving a 20% increase in digital storefront engagement across Swiggy and Zomato.
 - Optimized digital content and restructured product metadata based on consumer trends, successfully boosting customer conversion rates by 15% across target demographics.
 - Managed end-to-end commercial operations by implementing automated pricing calibration models and transaction verification checks, reducing manual data-entry discrepancies by 30%.

TECHNICAL & BUSINESS SKILLS

- Data Analytics & Modeling: SQL (PostgreSQL, Data Extraction, Schema Design, Table Auditing), Microsoft Excel (Power Pivot, Complex Formulas, Slicers, Interactive Dashboards).
- Business Intelligence: Power BI (Data Visualization, Business Intelligence), Financial Reporting, Statistical Trend Interpretation.
- Core Competencies: Data Validation, Anomaly Detection, Cross-Functional Coordination, Process Automation, Digital Platform Optimization (Swiggy, Zomato).

DATA & ANALYTICS PROJECTS

- Retail Sales Performance & Commercial Analysis, Advanced Excel, Data Modeling**06/2026
- Processed and analyzed store-level retail datasets to track seasonal sales variations and performance metrics across peak operational cycles during November and December.
 - Validated raw transactional datasets using comprehensive data-clearing rules and eliminated duplicate entries to guarantee 100% data accuracy for stakeholder business reporting.
 - Identified high-margin seasonal revenue trends and consumer purchasing patterns, translating raw data into actionable commercial insights.
- Spotify Data Architecture & Quality Management, SQL (PostgreSQL)**04/2026
- Configured and deployed a local PostgreSQL database environment to manage, query, and structure massive relational datasets containing Spotify audio features and streaming metrics.
 - Designed structured database tables from scratch using optimized primary and foreign keys to prevent data anomalies and maintain strict relational integrity.
 - Executed complex SQL queries to filter, manipulate, and audit transactional records, ensuring zero data loss during extraction for downstream business analysis.
- Ride-Sharing Dashboard Optimization, Advanced Excel**
- Cleansed and standardized a massive dataset containing over 150,000 operational records, successfully resolving structural inconsistencies and missing values to ensure data quality.
 - Developed comprehensive data models using Power Pivot and advanced logical formulas to accurately track regional performance metrics and consumer payment trends.
 - Designed a dynamic, interactive executive dashboard utilizing slicers and optimized data visualizations to streamline monthly business reviews for stakeholders.

EDUCATION

- Bachelor of Commerce (B.Com), Asha Maha Vidyalyaya | Varanasi**2022 – 2025
Varanasi
- Core Focus Areas: Financial Accounting, Business Economics, Business Statistics, Financial Management, and Business Research.
 - Key Insight: Acquired an advanced understanding of statistical data validation, business audit principles, and corporate governance essential for enterprise data operations.

VOLUNTEER & LEADERSHIP EXPERIENCE

- Operations Volunteer, Mahindra Kabira Festival**11/2025
Varanasi
- Managed the ingestion and validation of large-scale attendee records, ensuring operational data accuracy within a fast-paced live event environment.
 - Monitored logistical workflows and provided data-backed suggestions that enhanced crowd management coordination and team execution efficiency.
