SUMMARY

Operations-focused Business Analyst with hands-on experience optimizing commercial strategies and digital storefronts for local businesses. Proficient in SQL, Power BI, and Advanced Excel for cleaning large datasets (up to 500,000+ records) and building interactive dashboards that drive business decisions. Proven track record of improving customer conversion rates, automating pricing checks, and identifying actionable revenue opportunities.

PROFESSIONAL EXPERIENCE

- Business Operations & Digital Strategy Lead**, *Banarasi Zaika*  04/2025 – 05/2026
Varanasi
- Managed commercial operations and digital storefronts on Swiggy and Zomato, launching targeted video ad campaigns that increased customer engagement by 20%.
 - Analyzed consumer ordering trends to restructure digital menus and product metadata, resulting in a 15% increase in customer conversion rates.
 - Built automated pricing calibration models and daily transaction verification workflows, reducing manual data-entry discrepancies by 30%.

DATA & ANALYTICS PORTFOLIO PROJECTS

- The Terracotta Cafe Digital Storefront**  , React, Web Development 09/2026
- Developed and deployed a live, SEO-optimized web application for a local artisanal cafe to establish a new digital revenue channel.
 - Integrated digital table reservations and online ordering functionalities to streamline front-of-house operations.
- Decathlon India Sales Dashboard**  , Power BI, Data Visualization 04/2026
- Analyzed a sample dataset of 100,000 retail transactions (₹218.5 Cr in sales, 300,000+ units) to build an interactive dashboard tracking revenue, volume, and average order value.
 - Identified that apparel drove total sales volume and Tier-1 cities led in revenue, while bicycles yielded the highest individual basket value.
 - Recommended targeted consumer financing options to capitalize on high-ticket bicycle sales based on data findings.
- Retail Commercial Analytics**  , Advanced Excel, Profitability Analysis 03/2026
- Processed a raw retail dataset representing \$156.2M in gross revenue to evaluate profit margins broken down by geographic region and product tier.
 - Discovered a direct correlation between high product ratings and higher profit margins (averaging 45.2% overall).
 - Highlighted the Chicago region as the top revenue driver and identified clear opportunities to implement premium pricing strategies for highly-rated items.

TECHNICAL & BUSINESS SKILLS
